

# PROFIX TOKEN

Profit fix

January 2019

## ***Abstract***

Having a fixed amount of money input always gives us security. Unfortunately many times the way we get that security is becoming employees of a company, which binds us to schedules, subjects us to bosses and overwhelms us with routines.

Another way to get those profits without tie us to a workday is taking income from our property, whether leased property or interests of a money put into a bank. We all know that banks always win and the interest they provide to those who lend their money is scarce, at the mercy of their decisions, closures, bankruptcies, retention money, inflation, devaluation, etc.

As this model of money is already becoming obsolete, people are investing in virtual money where there are no banks and where you can win or lose money depending on the wisdom or luck. Profix, conforming to this paradigm shift, grant an interest to holders of its token, which exceed 10 times awarded by a physical bank.

We will make the investments taking advantage of the current economic times to give you a monthly income Tronix (TRX) to each buyer Profix. But unlike real banks whose rate is 2.5% per year, we will grant up to 2.5% monthly, ie if \$ 10,000 is deposited in a bank in USA and removed within a year will win \$ 250, but if you buy profix win up to \$ 3000.

Given the great advantages of our token, we hope that the price will also rise because of demand, so the first buyers also get the benefit that the value of the currency grew and if you ever need to sell, have obtained greater profit yet.

## 1. The dream of income

How many times we have gone to work and see some of our neighbors with sportswear or see in publications in social networks our friends traveling the world while we are in an office day after day of our lives.

How they do? They did not work? Some will be lucky and will work with a lot of vacation or work from home and others live their property (earned or inherited): leased property or money in the bank. Not to mention that going on holiday in low season is cheaper, there are fewer people thronging airports and attractions, and travel can buy items at affordable prices and some nonexistent in our latitudes.

Could we do without working for someone else and once gathered the money for a great trip, give up to do so. But without money we would return again, starting the wheel again. Nor would it be feasible in this process addressing long-term projects such as buying a home, pay rent or maintain a family.

As we have noted, many are presented with this problem and that is why we, based on the old axiom that an idea must be a solution to the disadvantage of many, decided to create a token that grants an income much higher than that can offer a bank so that many can fulfill his dream of having money and time to enjoy it.

## 2. The outdated model of physical money

Throughout history we have seen changes in financial models, from barter species, through the precious metals to today where we exchanged papers having a value for a backup that is alien to us and is in the hands of banks .

They are the ones who manage the destinies of the major economies are in trouble and when, countries and agencies choose to save them and not their clients, as we have recently seen in Europe.

Banks have our money and can provide (by law) to 9 times the capital that count. This means that if granted loans with an interest of 5% per annum, they actually earn 45% and give as customer rate on a fixed term only 2.5%. they get almost 20 times more profit with our money.

Often banks are closed, bankrupt, or withhold the money until a devaluation made our savings lose their value. If today we were all together to withdraw our money from the bank we could not do it because despite earning fortunes do not give back to those situations.

The world kept turning and the appearance of Bitcoin people have started investing in this new form of money, not only as an investment, but to keep it safe from thieves or as a form of savings. The world of criptomonedas grew exponentially and beyond increases or decreases of its greatest exponents, the volume of money involved in them grows daily.

### 3. New Paradigm: Profix

Faced with this situation we begin to think like revolutionize this model to adapt to the times and give people a really significant income. We wanted them to have a fixed monthly income to escape the traditional system and the combination of these two concepts, profit and fixed, born Profix.

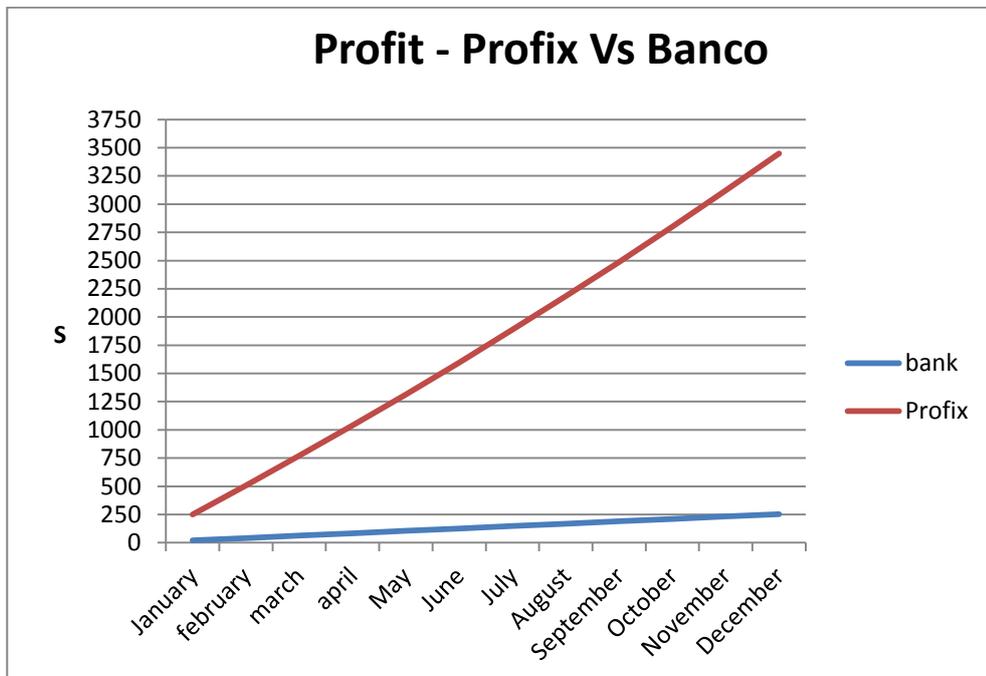

Our token give a monthly income according to the amount of Profix to count on the wallet, this income will be deposited in Tronix (TRX).

#### 3.1 Difference profit

A few months ago the US president was very upset with one of its officials because it had raised interest rates by 0.25% annually, amounting to 2.5% annually. This means that if you invested \$ 10,000 after one year you win \$ 250

As we have before, banks (which are the rulers) are left with much of our profit, so in Profix annual profit is up to 30%, meaning you earn in a month what a US bank pays in one year.

Below we show graphs illustrating the difference between what banks pay the rent and what you pay Profix:

MONTH	BANK			PROFIX		
	Month gain	Balance	cumulative gain	Month gain	Balance	Cumulative gain
January	20.83	10000	0	250,00	10000	0
February	20.88	10020.83	20.83	256.25	10250.00	250,00
March	20.92	10041.71	41.71	262.66	10506.25	506,25
April	20.96	10062.63	62.63	269.22	10768.91	768.91
May	21.01	10083.59	83.59	275.95	11038.13	1,038.13
June	21.05	10104.60	104.60	282.85	11314.08	1,314.08
July	21.10	10125.65	125.65	289.92	11596.93	1,596.93
August	21.14	10146.75	146.75	297.17	11886.86	1,886.86
September	21.18	10167.89	167.89	304.60	12184.03	2,184.03
October	21.23	10189.07	189.07	312.22	12488.63	2,488.63
November	21.27	10210.30	210.30	320.02	12800.85	2,800.85
December	21.32	10231.57	231.57	328.02	13120.87	3,120.87
January	21.36	10252.88	252.88	336.22	13448.89	3,448.89

Here we see that with an original investment of \$ 10,000 monthly profit and reinvesting get with a bank 252.88 and with Profix up to: \$ 3448.89 \$ is almost 15 times more !! Having money in a bank is to provide the gain to another.

### 3.2 Making Money with Profix

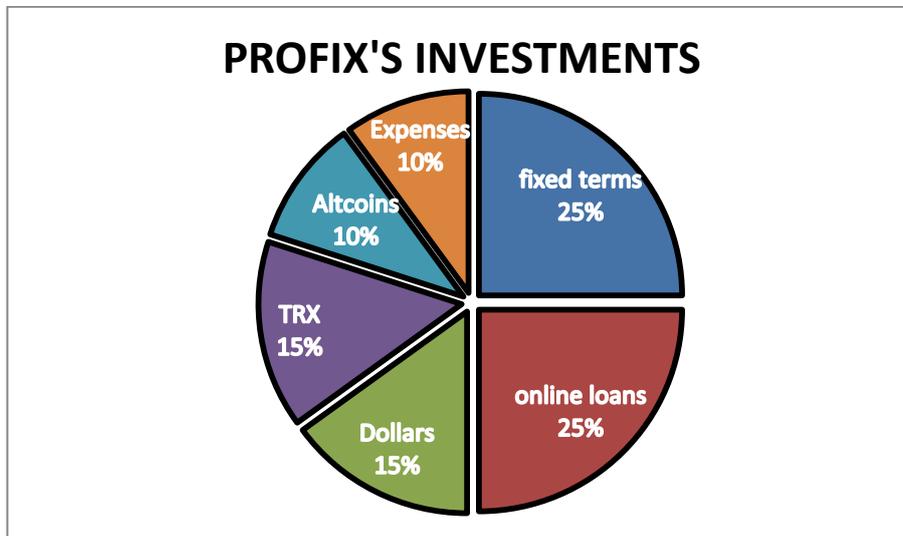

We have already seen that Profix is a far superior option to a bank and a fruitful investment to start making money, you should only buy the token on our website (<http://www.profixtoken.com>) Or the Exchange that which will soon be available, which will be duly updated on the aforementioned site information.

Come the 15th of the month our system will calculate the average price of token during the last month, except for outliers (exaggerated upper and lower peaks) and deposit the TRX corresponding value for each user. Example; if the average value is 2 Trx and the user has 100000 Profix, then that month the user will receive up to 5000 Trx.

No partial calculations are made, only the customer will be paid that day 15 in possession of the tokens regardless of whether bought 3 months or 3 days ago.

### 3.3 Safe Investments

Pay a return almost 15 times higher than that of a bank must have a good backup and that is why we have a variety of investments to guarantee it.

**Fixed term:** our headquarters is in Argentina and due to current economic conditions (high interest rate) is a good investment to have fixed terms of monthly renewal. Argentina leads the world rankings interest rate with a value greater than 40% annually, followed by Turkey with more than 20%. To give other examples USA has 2.5%, Japan 2% and Mexico 7.5%. In the case of Argentina this percentage must deduct the devaluation of its currency.

**online loans:** Given this particular situation in Argentina, online loans are very profitable, a user wants to take a loan of 100,000 and uses a site where users provide credit money and then receive their share of the appropriate fee for a big profit. Contracts to be doing several years at a fixed rate risk is less than other options.

**Dollars:** Due to the fluctuation of the local currency Argentina and also the cryptocurrencies, will safeguard the investment of dollars to alleviate possible devaluations or market slumps virtual currencies

**Trons:** Similar to the case of dollars of the money will also invest in virtual currency which is based on our token and grows daily among cryptocurrencies climbing positions.

**Altcoins:** It is perhaps the most "risky" part of the investment, emerging currencies will be chosen for profit with their price hikes, some holding them until their value rises and other buying and selling in a short time.

**Expenses:** Here operating expenses, commissions, salaries, fees, services, overhead, advertising and other expenses that the project entails have included running.

These are the initial investments which may be changing according as global economic markets move. It is considering investing in gold, shares of the stock exchanges, investment funds, property projects and others.

### **3.4 Increasing Value**

The high profitability of Profix will make it a highly prized token, since it has obtained profits thanks to him, and how it is based on its value, its price rising as more people want to invest in this project.

That's why it's a double inversion be among the first purchasers of Profix, not only receive monthly gain, but also will benefit from the rise in price when wanting to sell the token, which is equivalent to withdrawal of money physique of a fixed term of a bank.

## 4. Our Token

We have chosen to make our project by a token because it meets the slogans that we have proposed to start it, it is a virtual currency allows us to market and provide compensation for it and is also based on a free technology.

### 4.1 Its technology

Profix is performed under Tron technology, which is decentralized and free. Currently a lot of information from users and Internet traffic is concentrated in a few corporations such as Google, Facebook and Amazon. Tron attempts to mitigate this control giving ownership of the information returned to their creators.

### Its release 4.2

It will begin its sale in February 2019 through the website Profix (<http://www.profixtoken.com>) With its price of \$ 0.10, the first payment is estimated to be made on April 15, 2019, depending on what has been collected to invest.

In this first stage will be selling 250 million tokens Profix, resulting in a total of \$ 25 million, which is an amount in line with our current investment structures. With this amount of token sold, our total monthly payment amount to \$ 625,000 per month plus fees and charges for currency conversion.

In the second stage 250 million more tokens are released, giving a total of 500 million.

### **4.3 Distribution**

The main sales channel will be the project website, but then you can buy Profix at different Exchanges.

It is currently in talks with several Exchanges for distribution and also to prepare the operation of the monthly payments you receive buyers.

It is estimated that by March 2019 and may be exchanged in Cryptex by CRYT Profix, TRX and BTC.

As the distribution is higher, so will the complexity of the calculation because the price difference between the different points of trade exchanges also added with different virtual coins having to add new wallets and make the corresponding changes to unify investments.

## 5. Conclusion

Profix is a safe investment in cryptocurrencies, provides a stable monthly income much higher than the banks, and is a current way to protect the money and get a great benefit for it.

It also provides a great opportunity to multiply the money invested by the rise in price due to the large amount of demand that will have to be disclosed.

The greater number of people to invest, the higher its price thanks to the law of supply and demand. So, contrary to what happens when a large investment is obtained, which is kept secret not to split profits among more in this case each buyer will be an active promoter of this token with the support of monthly money received for your purchase.

Money can be invested in a bank and receive a paltry monthly fee while another usufruct that money, or may be invested in Profix and multiply by 15 the gain.

We recommend buying Profix as possible, because buyers do not want to sell to collect the monthly rent, so there will be many who want to buy small quantities for sale.
